## FROM THE CHIEF:

2019 has been a dynamic year for the Gulfport Fire Department. As we reflect back on our accomplishments on behalf of the men and women of the Gulfport Fire Department I would like to say thank you for the privilege of serving you, the citizens of Gulfport. I am truly blessed to be surrounded by a group of people who personify the ideals of selfless service and dedication to community, and you should be very proud of them and the great things they do for Gulfport on a daily basis.

One of our founding principles is to provide fire and life safety services in a manner that enhances the quality of life for our residents and visitors. We believe we are hitting that mark by providing fire and life safety services of world class quality and in a variety not seen anywhere else in our region. Additionally, we continue to be the only fire department in Mississippi to ever earn a fire protection classification of "2". We have held this distinction for 2 years now and are pleased that we offer our citizens and business community the lowest fire insurance rates anywhere in Mississippi.

Since we received this honor, I have had people ask, "what does this mean to the citizen who dials 911?" What it means is that you are getting the lowest fire insurance premiums available in Mississippi. It means that you have a 20% higher likelihood of surviving a cardiac or respiratory arrest than national averages, and it means that you can expect to have a level of fire and emergency medical services that is not available elsewhere in Mississippi and in only 2% of communities nationwide; you can be proud of that.

Extraordinary accomplishments like this can only be achieved through team effort. Besides the amazing firefighters who go well above and beyond the call of duty on a daily basis, our dispatch center, engineering and public works departments, our fire investigators, inspectors, mechanics, and administrative support professionals all play key roles in our overall fire rating. This rating was also not achieved in one year. This has been a vision achieved through years of consistent, focused effort.

As you will see looking through this annual report, the quality, depth, and breadth of services offered by your Gulfport Fire Department are something you can be proud of and depend on as we are a true all hazard response agency. You may think that quality services like these must be very expensive, however this is another area you can take pride in as our service delivery model is also very efficient. To give you some points of reference, Gulfport citizens are paying 17% less than the average of their neighbors on a per capita basis, and an astounding 41% less on a per call for service basis. This esprit de corps is indicative of the great team of people I am privileged to lead every day as your Fire Chief; thank you for that privilege.

Sincerely,  
Mike Beyerstedt MA, EFO, CFO  
Fire Chief

# 2019 INCIDENT RESPONSE SUMMARY

## 2019 Incident Response By Category

# 2019 INCIDENT RESPONSE SUMMARY

## Fire:

In 2019, There was a 6% increase in fires resulting in 6 civilian injuries and 1 civilian fatality. Additionally, 10 members of the Gulfport Fire Department suffered injuries during fire suppression duties. Property and content losses totaled \$5,579,134. However, The Gulfport Fire Department saved residents and businesses \$34,592,643 from fire destruction. More Fire analysis pp. 20-21

## EMS:

2019 brought a 4.25% reduction in medical responses. The disparity of medical responses was predominantly accumulated in the first quarter of 2019. All firefighters are trained to the minimum of EMT-Basic certification level. 26 members have elevated the certifications to EMT-Paramedic. GFD paramedics and EMTs responded to 228 out of hospital cardiac arrests (OHCA) in 2019. 45 of those had a Return of Spontaneous Circulation (ROSC) on scene. 15.6% of patients suffering from OHCA had a pulse return. This is a 2% increase from 2018's ROSC. A timely response is critical during a cardiac arrest. The average alarm to arrival response time for all OHCA incidents was 5 minutes 25 seconds.

## Rescue:

As an all hazards response department, the Gulfport Fire Department has staff certified in vehicle extrication, Rope Rescue (High Angle), Overland and Urban Search & Rescue (OSAR & USAR), Confined Space Rescue, Structural Collapse, Swift Water, and Dive Rescue. In 2019, the GFD initiated 9 water related search and rescue missions, 28 searches for persons over land, 32 extrications from vehicles, machinery, buildings, or elevators, and 1 high angle rescue.

## Hazardous Materials:

The City of Gulfport landscape is comprised of many miles of rail, highway and interstate transportation routes. This presents the community with a considerable amount of risk for hazardous material incidents. Hazmat incidents have a low frequency and high risk classification. The severity and amount of fuels and chemicals transported through our community can be devastating if spilled. The Gulfport Fire Department responded to 125 Hazmat incidents in 2019. Fortunately, these were mostly small fuel and chemical spills and residential carbon monoxide alarms. All GFD personnel are trained to the *Awareness Level* in hazardous material response. 95 members are trained to the next level of Hazmat Technician 1; 16 of those have extended their training to Hazmat Technician 2.

## INCIDENT COUNT BY DISTRICT

<b>DISTRICT 1</b>	<b>4,880</b>	<b>42.26%</b>

# 2019 INCIDENT RESPONSE SUMMARY

## Gulfport Annual EMS Response Trend

2016	2017	2018	2019
71%	71%	72%	71%

## US EMS Response Trend (NFPA 2018)

64%	61%	64%	Not Available
-----	-----	-----	---------------

The Gulfport Fire Department's calls for medical responses consistently remain slightly over 70% which is slightly higher than reported by the National Fire Protection Association (NFPA).

As seen in the charts left, Tuesday, Thursday, and Friday were the busiest days of the week. May, July, and August were the busiest months in 2019.

2019, as mentioned on page 3 shows a decrease in total calls for service. The decrease occurred in the EMS category during the 1st quarter.

## Relative risk of dying in a fire by state (2017)

Sources: National Center for Health Statistics and U.S. Census Bureau

The fire death rates presented here reflect the crude death rates and are not age adjusted. The crude death rate is the total number of fire deaths per state divided by the total population per state and multiplied by 1,000,000. s. Mississippi reported 58 deaths in 2017 yielding a fire death of 19.4. Mississippi's relative risk score of 1.7. Alaska, Arkansas, and West Virginia have the highest risk score of dying by fire.

# HAZARDOUS MATERIALS

In 2019, the Gulfport Fire Department responded to 127 hazardous materials releases in Gulfport's streets and structures. Only one incident released greater than 10 but no more than 30 gallons of fuel. All department apparatus are equipped to handle small road and gas station spills, however, Station 12 houses the department's Special Ops & Hazardous Materials response unit to mitigate large spills. All personnel are trained to HazMat Awareness level and Gulfport Fire Department has 95 personnel certified at the HazMat Technician 1 level; 17 of those are certified to the TECH 2 level. All personnel participated in 262 training hours in 2019 to maintain their Hazmat skills.

Mini CO detectors are attached to all medical kits to alert responders of odorless and colorless Carbon Monoxide presence. Upon entry into a toxic environment, the detectors are awakened and alert responders of the immediate danger to life (IDLH) environment. Additional, department Hazmat monitors have capabilities of measuring and detecting hydrogen cyanide, hydrogen sulfide, chlorine, blister agents, radiation and lower explosive limits (LEL) of combustible gases. Hazmat/Special Ops 12 is equipped to monitor, research, contain, decontaminate, and assist with clean-up of hazardous material incidents.

# RESCUE

In 2019, the Gulfport Fire Department responded to 70 incidents within the rescue category. GFD/Task Force 3 members performed, and were awarded for, a high angle rescue near Camp Shelby (see awards page). GFD members also performed 28 searches for person over land, 7 searches for persons in water, 1 extrication from a building, 23 removal from stalled elevator, 6 extrication from vehicles, 2 extrications from machinery, 1 surf rescue, and 1 watercraft rescue.

# DIVE & WATER RESCUE

The Gulfport Fire Department Dive Rescue Team is comprised of approximately 25 members who volunteer their time and experience to serve our community. Even though they may be experienced recreational divers, each member undergoes a strenuous training program to become certified to the level of Dive Rescue Specialist. The Dive Rescue Specialist certification is issued through Dive Rescue International, one of the most highly recognized and awarded dive training agencies in the world. GFD also boasts having a Dive Rescue International Trainer/Instructor, one of only a few in the State of Mississippi, on staff to facilitate team training and credentialing.

The GFD Dive Team provides a variety of services including water rescues, search and recovery operations, underwater surveys and reconnaissance, and various marine and dive support functions. The GFD Dive Team has performed drowning victim recoveries, located and recovered evidence used in high profile court cases, provided safety and security inspections for ships in the Gulfport Harbor, and provided additional support for military special operations. The GFD Dive Team has also been called on to assist other agencies including the US Coast Guard and the Mississippi Department of Marine Resources.

In 2019, the Gulfport Fire Department Dive Team performed several in-water vehicle recoveries, recovered drowning victims, searched for a murder weapon in a river under extreme conditions, and is proud to report that we have not had a single duty related injury or incident. In addition, every member of the team has maintained and renewed any credentials necessary.

In the past year, the GFD Dive Team has had several members retire, but we have trained and added 10 new divers to the team, most with long careers ahead of them, which will help to ensure the services offered by the Dive Team to our citizens for years to come.

The Gulfport Fire Department, and its Dive Rescue Team, stands ready 24-7, to provide our citizens, our neighbors, and our working partners with the highest level of public safety diver support and assistance available.

# TACTICAL MEDIC

In 2018, the GFD Tactical Medics served 19 warrants with the Gulfport Police Department's narcotic team.

*Mission: Tactical Paramedics will have the ability to render immediate care in a tactical operational area where it is either unsafe or impractical for other medical personnel to do so. The goal is to stabilize an injury so that the patient can be safely transported out of the tactical environment for more substantial care.*

Tactical Medics currently serve in two capacities, armed and unarmed. Armed Tach Medics endure 400 hours of training and are required to achieve GPD Reserve Officer, complete a Basic SWAT Training Course, SWAT Medic Training Course, Defense Tactics & Subject Control, among other complimentary courses. They are required to meet firearm and tactic standards in day and night qualifications as well as SWAT qualifications quarterly.

The tactical medics trained 4,120 man hours in 2018 with GPD SWAT to ensure fluid team unity and proper execution of tactics and protocol when serving warrants, search and seizure during drug raids, and potential active shooter/attacker situations.

The Gulfport Fire Department Tactical Medics Program is the first and only of its kind in the state and we have assisted other agencies nationally in developing similar programs.

Denis Davidson	FF of the Year	Coast Chamber	December

Several local organizations and businesses provide the department the opportunity to reward personnel that have demonstrated exceptional performance and bravery throughout the year. Above are those members and the organization awarding them.

GFD/Task Force 3 members received a the **Mississippi Meritorious Civilian Service Medal** for search, high angle (rope) recovery, and care of paratroopers during "Arctic Anvil" joint forcible entry exercise on 2 October 2019.

The Gulfport Fire Department took 1st Place by raising **\$19,484** for the Muscular Dystrophy Association's *Fill the Boot* Campaign.

# PERSONNEL

2019 Attrition Analysis

The past few years have yielded a high force reduction due to a tide of retirements. The past few years' attrition required the department to host multiple recruit classes within the same year. 2019 saw the force reduction tide turning, which yielded only 1 recruit class. As a result of recent years' new hire influx, the department finds itself young in years of experience. Per the chart right, the years of service for the Engineer and Lieutenant positions are on average 5 years younger than past years of experience for those positions. This factor, along with the reduction of structure fires, compared to previous decades, makes current firefighters and officers, compared to their predecessors, lacking the experiences in the most dangerous thing they do. This is where training is critical in preparing new hires to officers for the worst day of a citizen's life.

Recruit Class 1901 was comprised of 8 Gulfport, 2 Harrison County, and 1 Pascagoula Fire Departments. Gulfport also hired 2 lateral, already trained, firefighters.
